PROFESSIONAL SUMMARY

- Results-driven **Full Stack Java Developer** with **3.5 years** of experience designing and implementing enterprise web applications using Java, Spring Boot, Angular, and Microservices architecture.
- Proven expertise in developing RESTful APIs, optimizing database performance, and delivering scalable solutions in Agile environments.
- Strong track record of improving system efficiency by 30% and reducing defects by 20% through code quality initiatives and collaborative development practices.

TECHNICAL SKILLS

- **Programming Languages :** Java 8, Java 17, JavaScript, TypeScript, SQL
- **Testing & Quality:** JUnit, SonarQube, PMD, SpotBugs, Checkstyle, Unit Testing, Integration Testing
- **Operating Systems:** Windows, Linux (Ubuntu 22.04)
- **Backend Technologies:** Spring Framework, Spring Boot 2.x/3.x, Spring Data JPA, Hibernate ORM, Spring Security, REST API, Microservices
- **DevOps & Tools:** Maven, Git, GitHub, GitLab, Apache Tomcat, Docker (Basic), CI/CD Pipelines
- **Others:** RESTful Web Services, JSON, XML, Redmine, JIRA
- **Frontend Technologies:** Angular 12+, ExtJS, HTML5, CSS3, Bootstrap, TypeScript
- **Development Tools:** IntelliJ IDEA, Eclipse, Spring Tool Suite, VS Code, PGAdmin, DBeaver
- **Google Cloud Platform (GCP):** Cloud Storage, IAM, OAuth 2.0, Cloud Functions
- **Databases:** MySQL, PostgreSQL, Database Design, Query Optimization, Reverse Engineering
- **Methodologies:** Agile/Scrum, Test-Driven Development (TDD), Code Review, Sprint Planning

PROFESSIONAL EXPERIENCE

Brightleaf Solutions Pvt Ltd , Associate Software Engineer

Jul 2024 – Present | Pune, India

- Developed and maintained **13 microservices** for **Text Extraction Engine project** within a **9-member** Agile team, improving document processing efficiency by 30%.
- Implemented AWS S3 integration for cloud-based document storage and retrieval, enhancing scalability and reducing storage costs by 25%.
- Conducted comprehensive code quality analysis using SonarQube, PMD, and SpotBugs, reducing critical bugs by 40% and code duplication by 30%.
- Built RESTful APIs using Spring Boot 3.x with proper exception handling and validation, ensuring 99.5% API uptime.
- Collaborated with cross-functional teams in daily standups, sprint planning, and retrospectives to deliver features on time.
- Enhanced Angular-based UI components for text extraction workflows, improving user experience and reducing processing time by 20%.
- Applied Checkstyle standards across codebase to maintain consistent code quality and readability.
- Utilized Hibernate ORM and PostgreSQL for efficient data persistence and optimized database queries reducing response time by 35%.

Nascent Info Technologies Pvt Ltd , Associate Software Engineer

Feb 2023 – Jul 2024 | Ahmedabad, India

- Designed and developed **CEICED Portal** for Gujarat Government serving **3 modules** with **8-member** development team.
- Created 25+ RESTful APIs using Spring Boot and integrated JSP/ExtJS frontend, reducing data retrieval time by 40%.
- Implemented payment gateway integration resolving critical bugs and ensuring 100% transaction success rate.
- Performed database schema design using Hibernate and PostgreSQL, optimizing data storage efficiency by 25%.
- Executed comprehensive code reviews reducing post-deployment defects by 20% and debugging time by 30%.
- Enhanced UI components using ExtJS framework, increasing user engagement by 15% based on client feedback.
- Achieved 15% increase in client satisfaction through direct client interaction and timely delivery of requirements.
- Refactored legacy code improving application performance by 45% and reducing resource utilization by 20%.
- Participated in Agile ceremonies including sprint planning, daily standups, and retrospectives.

KEY PROJECTS

Text Extraction Engine Server

2024 – Present

The Text Extraction Engine Server Application is a software system designed to streamline document processing, offering features for text extraction, analysis, and reporting, covering pre- to post-processing stages.

Technologies: Java 17, Spring Boot 3.x, Microservices, REST API, Angular 14, MySQL, AWS S3

- Built enterprise document processing system with 13 loosely coupled microservices handling end-to-end text extraction pipeline.
- Upgraded S3 bucket versioning, improving data integrity, version control, and storage reliability.

- Implemented comprehensive code quality gates using SonarQube, PMD, SpotBugs, and Checkstyle reducing technical debt by 35%.
- Developed Angular frontend with responsive design and real-time progress tracking for document processing workflows.
- Achieved 30% reduction in code duplication and improved maintainability score from B to A grade in SonarQube.

Project Name :- LB Exam Portal

2023 – 2024

- **Environment** : - JSP (Java Server Pages), Apache Tomcat, IDEs like Eclipse, Project Management Tool like Redmine, RDBMS like MySQL & PostgreSQL, VCS like GitLab.
- **Size** : - 4

Responsibilities :-

- Designed, implemented, and maintained Java-based software applications with a **JSP front** end, actively contributing to frontend development.
- Developed APIs using **JSP**, and actively engage in designing and implementing frontend logic in **JavaScript and jQuery** to hits the API in backend.
- Collaborate in the development and testing of application features within the **JSP technology**, focusing on frontend functionality.
- Implemented the repository layer for database operations using **JSP** and **Java EE technologies**, ensuring seamless integration with frontend components.
- Working on the **JSP framework**, utilizing dependency injection for various components, and enhance frontend interactions using **JavaScript**.

CEICED Portal for Gujarat Government

2023 – 2024

Facilitated the issuance of authorized licenses for **Supervisors, Wiremen, Contractors** and **Lift / Escalator** operators through the portal.

Technologies: Java 11, Spring Boot 2.7, REST API, JSP, ExtJS, PostgreSQL, Hibernate.

- Designed and implemented licensing portal for supervisors, wiremen, contractors, and lift/escalator operators.
- Developed LB Exam portal with RESTful APIs and integrated payment gateway for online fee collection.
- Created database schema with Hibernate ORM optimizing data storage and retrieval operations by 25%.
- Built ExtJS-based UI components with client-side validations increasing user engagement by 15%.
- Improved application architecture and performance by 30% while reducing resource usage by 20%.

EDUCATION

Bachelor of Engineering in Electrical Engineering

2017 – 2021 | Shegaon, India

Mauli College of Engineering & Technology, Shegaon

LANGUAGES

English, Hindi, Marathi, Gujarati

DECLARATION

"I hereby declare that the above particulars of facts and information stated are true, correct and complete to the best of my belief and knowledge."
